

Products

Product features

Width: 350mm~1225mm (customizable)

Cooling power: 100~150 [W/m²]

Atmospheric window

emissivity: >90% Product

length: 50m

(customizable) Product

thickness: 200µm

Reflective Film

Reflective films can be directly attached to opaque exterior surfaces of structures, such as building roofs, walls, automobile bodies, and LNG storage tanks.

Product Information

Color: silverwhite

Heat reflectivity: >90 (SR) (%)

Product features

Refrigeration: efficient cooling, solar energy isolation

Environmental protection: no additional energy consumptions

Self-cleaning: hydrophobic, oleophobic, antifouling, easy to clean; Waterproof: grade

1 waterproof: Dust-proof: high-quality water-repellent material, no dust after wiping, wipe with a damp cloth;

Durable: high UV resistance, antistatic anticorrosion.

Transparent Film

The Transparent films can be directly attached to the exterior surfaces of structures that need illuminations, such as windows, facades glazings, and skylights.

Product Information

Color: transparent

Solar Absorption: 20 (SAV) [W/m²]
